

take client engagement + service delivery to the next level

Without systemised and automated processes, advisory services are too often reactive, ad hoc, inefficient and expensive. This undermines the enthusiasm of accountants, consultants and financial planners to deliver advisory services and denies clients the benefits of this advice.

MYP's one-of-a-kind platform is an industry game changer. Its specialised software for advisers provides the infrastructure to deliver targeted end-to-end advisory services and stand-alone solutions to their clients.
